

Warm up

Write the linear equation in slope-intercept form. Then graph it.

1. $4x + y = 10$

2. $3x - y = 7$

Write the linear equation in slope-intercept form. Then graph it.

3. $2x - 3y = 6$

4. $5x - 3y = 15$

Use the graph to find the x - and y -intercepts. Write the equation of the line.
